

The Prium 11 mm is the right choice for workers demanding a rope with superior strength and low elongation that remains compatible with most mechanical devices. The Prium uses a polyester sheath for increased resistance to the effects of humidity, dirt and dust. The super strong polyamide core combines with the 32 carrier sheath for good handling and twisted yarns for a very high level of abrasion resistance.

**High static strength (35.7 kN)**

**Polyester Sheath with 32 carrier**

**Polyamide Core with 18 strands**

**Low elongation**

White/Red - **501**: 50 m, **601**: 60 m, **1001**: 100 m, **2001**: 200 m, **6001**: 600 m

Sheath is made with **twisted yarn**, which improve abrasion, resistance and durability of the rope

For 200 and 600 m lengths **replacement labels included!**

Can be used to replace old labels or for individual identification
