

FRAZEN 12.2 mm

ROPE

Ref. 2817

TREE CLIMBING

A new generation of semi-static rope specifically designed for tree climbing activities.

The innovative braided core and the robust 16 carrier sheath give the Frazen 12.2 mm exceptional features of high strength, low elongation, and supple handling.

The 100% polyester structure reduces the effects of humidity, dirt and dust.

Available in different lengths with a revolutionary kind of spliced termination that makes the loop compact enough to pass through mechanical Prusik devices.

100% Polyester structure

16 Carrier

Spliced termination

Black/Yellow/Blue - **351**: 35 m, **451**: 45 m, **601**: 60 m

Innovative braided core
